It is with great pleasure that I recommend Triplo4 Sustainable Solutions as a highly competent and reliable provider of environmental assessment practitioner services. Their completed work on the Part 2 Amendments for Ballito Precinct as well as current Environmental Control Officer duties clearly demonstrates their expertise, professionalism, and dedication to environmental sustainability.

One of Triplo4's most significant contributions to this project was obtaining the required amendments to the authorisations such as NEMA. To achieve this, they demonstrated a thorough understanding of the project's historical context and developed practical solutions whilst ensuring compliance with regulatory requirements.

Triplo4 has proven to be reliable in terms of consistency in helping ARCIS meet the various environmental requirements for the project. Their reporting and work ethic are of great quality. In addition, their consultants are readily available to solve problems and provide innovative solutions within the environmental and development legislative frameworks.

Triplo4 undertakes the necessary environmental audits and monitoring activities for our project, as well as managing planning, progress reporting and troubleshooting of the project. Furthermore, Triplo4 ensures appropriate corrective measures were promptly implemented whenever non-compliance incidents occurred at the site.

Based on my experiences, I recommend Triplo4 Sustainable Solutions as an EAP providing environmental consulting services.

Yours Faithfully

**WJ Pieterse**

Director
