To whom it may concern,

It is with great confidence that we recommend Triplo4 Sustainable Solutions for their comprehensive suite of environmental consulting services. Based on our professional relationship which commenced in 2017, Triplo4 consistently offer excellent service and always make every effort to go the extra mile.

We were very grateful for Triplo4's collaborative approach with the professional team in undertaking the Specialist Studies, Basic Assessment, Environmental Management Programme and Water Use License Application for the Homestead Estate located in Umhlali, iLembe District Municipality, KZN. Their excellent understanding of the site sensitivities, knowledge of the regulations enabled us to navigate the complicated journey towards successfully obtaining our Environmental Approval and WULA. These deliverables contributed significantly towards us ultimately acquiring our SPLUMA approval.

Triplo4 are pleasant to work with and are always available to assist with queries. We have enjoyed outstanding communication, from inception to completion with ongoing progress updates through the project. The execution of the scope of work was completed with the final submission to the authorities being of the highest standard.

It has been a pleasure working with the Triplo4 team and looking to undertake more projects with them.

Sincerely,

Haden Keeton
Director
